Note: The TZ100 has now been replaced by the TZ200. Panasonic has maintained the TZ100 for sale, and due to its age it is one of the best cheap cages that you can buy at this time. Features sensor CMOS1.0 inches, 20.1MP25-250 mm F / 2.8-5.9 Zoom Lens4k Video Capture 1.0 inches The sensor immediately increases the ZS100 / Tz100 above the level of many other rival travel cages. It is the same sensor that is located in the Superior Puente de Panasonic, the successful Lumix Fz1000. In the ZS100 / TZ100, it is combined with a new Venus engines processor and a Leica DC Vario-Elmarit 25-250 mm f / 2.8-5.9 zoom lens. The OIS stabilization system of Panasonic for the set photograph and the stabilization of 5 axes for the video is also the video stabilization system. Image 1 of 3 Special The increase in the pĀxel count over that of ZS50 / Tz70 of the past year, the fact that the sensor is 4x more large in the ZS100 means that the pages are 2.4x more large , what should be very good news for the quality of the image and noise control in particular. This has given Panasonic the courage to give the ZS100 a rank of native sensitivity of ISO125-12,800, and there are also an expansion configurations of ISO80, 100 and 25,600. The 10x Óptic zoom means that Panasonic is describing the ZS100 as belonging to a completely new sector of the compact travel market: Superzoom Premium. All other sensor cages of a small inch (pocket) are limited in its zoom range, so it is quite exciting to see that the company chooses a cattle that should attract more than traveler photographers. Panasonic enthusiasm for all things 4K, is not surprising that the ZS100 has 4K recording capacity (30 or 25 paintings per second) and 4K photo modes are present to facilitate the eterefid eterefid euoqne nu noc senegĀ,mi ed aicnuces anu amot aramĀĀc al odom etso ne ,sucoF tsoP ,eugelig K4 odom la cinosanaP ed nĀĀicaproccni amĀĀĀ al ĀĀise nĀĀĀibmaT)JSP(odugses rop sordae 03 a PMB ed sajj and you can change the shot in which your subject is a post-power capture. In addition, the ZS100 has a 4K cut that allows the composition of the 4K images to be improved and shown down to Full HD on the camera. Another cherry in the specification cake is the fact that the ZS100 can record unprocessed files, as well as JPEGsViewFinders are making a welcome return to compact cameras and the ZS100/TZ100 has a 0.2-inch electronic viewer and 1,160,000 built-in dotes to facilitate image composition in bright, bright images? Naturally, this is accompanied by a larger screen at the back of the camera, and in this case it is a 1,040,000 3-inch drive that is sensitive to touch. Helpfully, there is an eye sensor to detect when the camera stays in the eye to turn off the main screen and activate the other cherry in the specifications cake is the fact that the ZS100 can record unprocessed files and JPEGs. This is well with the opening priority, the shutter priority and manual exposure modes that accompany automated shooting options. In addition, the shutter speed can be set at 60-1/2000 seconds when the mechanical shutter is in use or 1-1/16000 seconds with the electronic shutter. Therefore, it should be possible to freeze a very fast movement and use the wider opening with bright light. Interestingly, although Wi-Fi connectivity is present, NFC technology is not "Panasonic says this has not proven to be widely used as expected. In terms of competition, the ZS100 faces the latest compact cameras of an inch of Sony and Canon rivals, including the RX100 IV and the G7 X Mark II, but none of them has such extensive zooms. It could be said, therefore, the ZS100 currently does not have ¼ĀĀĀ ¼ĀĀĀĀ :001ZT ¼ĀĀĀĀ :001ZT cinosanaP - sotcapmoc somroforemaC eĀjiv ed mooz tseB ,sonacrec
